# Commercial laundry plants: what we clean

Tour both the soiled and clean sides with your plant manager and tick each area to include.

**Facility** _____ **Address** _____

**Walked by** _____ **Date** _____

## Production and staging floors

- ☐ Open floor beside sorting and staging areas
- ☐ Lint picked up dry before any wet method
- ☐ Damp floors and detergent residue near washers
- ☐ Floors around washers and dryers each shift or each day
- ☐ Concrete scrubbing for high-traffic lanes
- ☐ Garments, carts and textiles left with your team

## Soiled and clean sides

- ☐ Separate sequence and tools for the soiled side
- ☐ Crews moving from clean areas toward soiled ones

## Overhead lint

- ☐ Beams and wall tops above production
- ☐ Ledges where lint settles
- ☐ Overhead work booked as a seasonal project

## Equipment exteriors

- ☐ Machine exteriors wiped while idle
- ☐ Operating state set by your procedures

## Customer and staff rooms

- ☐ Customer counter cleaned before the doors open
- ☐ Customer waiting area
- ☐ Offices
- ☐ Restrooms and breakrooms, usually daily
- ☐ Locker and staff rooms

## Shipping dock

- ☐ Dock floor where carts move to trucks
- ☐ Packaging and debris kept off production
- ☐ Parking area, if added

## Schedule

- ☐ Overnight visits for day-running plants
- ☐ Between-shift windows for two-shift plants
- ☐ Weekend visits when lines stop
- ☐ Pattern reviewed as volume changes
